Get the game changing facts about generic drugs.

Generics have the same active ingredients and work the same way as their brand name counterparts. Like brand medications, generics are also approved by the FDA and deliver the same dosage and medical benefits. Generics are safe, effective, and readily available – and can save you up to 60% on out-of-pocket costs.

Visit our online *Generic Resource Center* to find out if there is a generic available for your current medication and start saving on your prescriptions today.
